Installing GCloud SDK ,Python and other dependencies

For GCloud SDK installation refer to below link

https://cloud.google.com/sdk/docs/install#windows

For python installation on different OS please refer to below links

https://realpython.com/installing-python/

https://tecadmin.net/install-python-3-7-on-ubuntu-linuxmint/

After the python is installed, we need to install below dependencies in order to run our scripts successfully.

pip install apache-beam[gcp] **or** *python3 –m pip install apache-beam[gcp]*

pip install google-cloud-pubsub **or** *python3 –m pip install google-cloud-pubsub*
